FORGED IN FIRE Champion
MCC Bladesmithing Instructor

MONTGOMERY COMMUNITY COLLEGE
FALL 2017 SCHEDULE

OUR PLAN IS TO MAKE YOU SUCCESSFUL

It's your life. You have plans - plans to learn, to grow, and to do. Montgomery Community College is here to help. It's something we've been doing for 50 years now and we're pretty good at it. So our plan is to help you with your plans, whatever they are.

Want a new job? We can help! Employers in the county tell us the skills they're looking for and we set up classes to train people for those jobs.

Want to gain new skills? We've got classes that will give you the edge for that interview or promotion. Learn English if you're not a native speaker, or get your high school equivalency diploma.

Want to be your own boss? We can help you explore your options to see what's right for you.

Want to have fun? We've got you covered there, too. Throw a pot, keep honey bees, make a basket or a kitchen knife. Take an online class and learn a new language.

Whatever your plans, we're here for you. We want to see you succeed. Tell us how we can help.

Want a New Job?.....05
Want to Gain New Skills?.....14
Want to Be Your Own Boss? ..20
Want to Have Fun? 22
Want a Degree? 32

On the cover: Theo Rock Nazz, maker and purveyor of fine kitchen and utility blades and weaponry. In a former life, Nazz was a 3D computer artist, ironwork designer, and product designer and developer. His blades reflect this combination of skills in beautiful, one-of-a-kind works of art. He is a 2017 FORGED IN FIRE champion and teaches bladesmithing at his home forge in Brooklyn, N.Y. He will be teaching a class in FORGING AN INTEGRAL FIGHTER KNIFE in October at MCC. See page 22 for more details.

THE STUDENT BECOMES THE TEACHER

Carolyn Williams has cared for thousands of patients and hundreds of students over the last 46 years. Carolyn was a member of the **second Practical Nursing graduating class** at Montgomery Technical Institute in **1971.**

Even though it took place years ago, her story resonates with anyone who has wanted to do something better with their life, took a step into the unknown, and enrolled in college.

Carolyn graduated from East Montgomery High School. She wanted to continue her education, but had no idea what she wanted to do with her life. **She couldn't afford college,** so like many of her classmates, she went to work at a mill. To say that the work did not suit her is a gross understatement.

"I hated it. I cried and cried," Carolyn said. She needed a plan to do something different with her life.

"I talked to my mom and she brought me to MTI to talk to Mrs. Jenkins about the Practical Nursing program," she said.

After finding out how much it would cost for her tuition, fees, books and supplies, Carolyn went back to the mill with a mission.

"I saved every penny I made so I could go to nursing school. I worked for eight weeks and I was out of there," Carolyn said.

It was a giant leap of faith. She had no idea if the program would be what she wanted or if she could even complete the course work. What she did have was a determination to change her life

On her first day of nursing school, Carolyn remembers feeling overwhelmed and intimidated, but she didn't hate it, and she didn't cry.

"Mrs. Jenkins was tall and overpowering. She told us

what our next year of life would consist of. When I walked out that evening, my stack of books was taller than I could see around," Carolyn said.

There were 33 students in her class on the first day, but less than half made it through to graduation.

"I didn't know what I was getting into. The second day we had a pop test. Every time we had another test it seemed like someone else dropped out," Carolyn said.

Carolyn persevered and in one very short year it was time to graduate.

"It was one of the best moments of my life. I remember how proud I was when I put on my whites for the first time and marched into the church. We bowed our heads and Mrs. Sinclair pinned our hats on, then Mrs. Teeter pinned our pins on. We said our Nightingale Pledge holding our roses . . . it was pouring down rain outside. I thought, **'This is what I worked so hard for. It was worth everything I did to get here,'** she said.

Carolyn's first job was at Moore Memorial Hospital (as it was called in 1971). Twenty-six years later, Carolyn went back to school to become a registered nurse. Since then, she has spent most of her time in occupational nursing.

Carolyn's sister was teaching Nursing Assistant classes at Montgomery Community College and encouraged Carolyn to join her. Carolyn has now been teaching Nursing Assistant classes for 17 years at MCC.

"It's rewarding to help someone get where they want to be in their lives," Carolyn said. "I like seeing the lightbulbs go on when they understand something and they come back and tell you what a difference you made in their lives."

BECOME A NURSING ASSISTANT . . .

WHAT IS A NURSING ASSISTANT?

Nursing assistants (NAs) typically work in skilled nursing facilities, long-term care facilities, home health, or other settings where people need help with basic care. NAs typically assist with patients with bathing, toilet functions, meals and eating, moving or walking and other personal care. First and foremost, the NA cares about people!

Are you ready to begin your career in the health care industry? If so, check our website for more information or call 910-898-9672.

WANT A NEW JOB ?

[FL*UH*-**BOT**-*UH*-MEE]
noun: *Medicine/Medical*

1. the act or practice of opening a vein for letting or drawing blood as a therapeutic or diagnostic measure.

If you've ever had your blood drawn it was very likely drawn by a phlebotomist. Many health care professionals learn phlebotomy to give them more skills for the job market.

Phlebotomists work in medical facilities such as hospitals, medical offices and labs. Depending upon the workplace, some phlebotomists can draw blood from over 100 patients a day.

If you enjoy working with people, if you are patient and compassionate, if you enjoy working in a medical setting, this could be a career you would enjoy.

According to the U.S. Bureau of Labor Statistics, the market for phlebotomists is 25% through 2024, meaning that job growth is much faster than average. The annual median wage for phlebotomists in North Carolina is $29,460.

HOTTALKS

. . . ABOUT PERSONAL DOWNTIME, TROUBLESHOOTING HIS CAREER, AND GETTING HIMSELF OPERATIONAL ONCE AGAIN.

www.montgomery.edu/futurestudents/continuing-education

When an injury prevented James Minor from driving a truck for a living, he went back to school to learn how to do something new. After several surgeries he needed an income to pay his bills but he needed the skills for a new job first.

James enrolled in the Certified Production Technician (now called Industrial Maintenance Technician) program at Montgomery Community College. In two semesters, he earned his certification as a maintenance technician. He is now employed by Uwharrie Mountain Renewable Energy where he is responsible for everything from ensuring visitors' safety to overhauling engines.

James says he applies daily what he learned in his training at MCC. As a result, he won the Biomass Safety Award for the first quarter of 2017.

"The safety I learned at MCC made me question something that turned out to be a problem," James said. "We were able to fix it before somebody got hurt."

Uwharrie Mountain Renewable Energy converts landfill gases into energy that is then sold to the power company. There are six large generators that do the work. James monitors the computer system and maintains the generators on a preventive schedule. If a machine goes down, he has to diagnose and fix the problem – fast.

"Not only did I take the program at MCC, the people there helped me find a job."

"We lose about $500 an hour if a machine goes down," James said. He can predict if a system is going to fail by interpreting the readings he gets from a machine.

Preventive and predictive maintenance are covered in MCC's Industrial Maintenance Technician program along with repair, servicing, and installation of industrial machinery. The program is actually tailored to the needs of local industries so it gives students the skills they need to get jobs locally.

"We have a good relationship with employers and when they have job openings, they call us," said Andrew Gardner, Director of Business & Industry Services at MCC.

"Not only did I take the program at MCC, the people there helped me find a job," said James.

While James was in the program he also took welding, and Microsoft Office computer classes, both of which have applications in hundreds of other jobs.

Job training is at the core of MCC's Continuing Education mission. For more information about the Industrial Maintenance Technician or other job training programs at MCC, contact Andrew Gardner at 910-898-9674.

INDUSTRIAL MAINTENANCE TECHNICIAN

8/21-12/18 | M&W | 1-2:30 PM
| T | 8 AM-12 PM & 5-6 PM
| TH | 8 AM-12 PM | $181.60

Apprenticeships for the Industrial Maintenance Technician program are available. Apprentices train with local employers with the goal of moving into the maintenance field. For information contact Andrew Gardner at 910-898-9674.

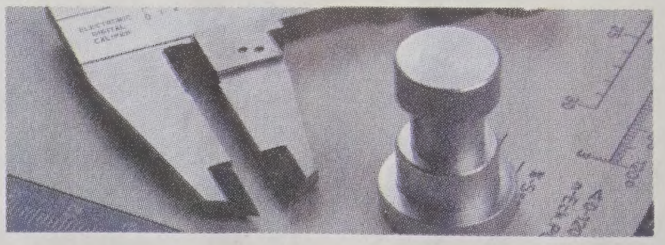
APPRENTICESHIP MONTGOMERY

INDUSTRIAL SYSTEMS TECHNOLOGY APPRENTICESHIP

This apprenticeship program is designed to prepare individuals to safely service, maintain, repair, or install equipment. The program emphasizes practical, hands-on application in industrial systems and offers additional advanced course work that will take you as far as you want to go in a career. Apprentices train with local employers with the goal of moving into a maintenance field.

Apprenticeship Montgomery is designed to be able to add options based on employer needs. Montgomery Community College and the Apprenticeship Montgomery leadership team are always seeking opportunities to offer new career options and employer partners.

Employers interested in participating in Apprenticeship Montgomery or introducing another career option, please call 910-898-9674.



BECOME A WELDER . . .

7 INCREDIBLE FACTS ABOUT CAREERS IN WELDING*

FACT 1. Welding does not require a college degree.

FACT 2. Welders have countless career paths to choose from.

FACT 3. Welders have out-of-this-world traveling opportunities.

FACT 4. Skilled welders are always in high demand.

FACT 5. Welders have the ability to earn the salary of a doctor or lawyer.

FACT 6. Welding is the ultimate Green Collar career choice.

FACT 7. The future job outlook for welders is awesome.

COME FLY WITH LEE

It was about 3:30 in the afternoon when the Silver Alert came across the scanner. An elderly man in pajamas had been out wandering for several hours and his family got worried when they couldn't find him. They called 9-1-1 and a member of emergency services called Montgomery Community College to request assistance with a drone search.

Only a few weeks before, Montgomery County Emergency Services, law enforcement, and fire and rescue personnel took a course on how drones could be utilized in emergency operations. The class was taught by **Lee Smart** at **Montgomery Community College.**

Minutes after the call went out, Lee was on site with a drone with heat-sensing infrared capabilities. The man was quickly found and happily reunited with his family.

TIME IS VITAL IN EMERGENCY OPERATIONS. First responders have seconds to make calls that will decide the outcomes to every scenario they face. With the use of drones, emergency service crews can safely and rapidly access information from dangerous or difficult-to-reach places. For the Silver Alert, time was the greatest concern. Lee's drone could cover more ground with less manpower and with more speed than rescue workers could achieve from the ground.

It wasn't the first time Lee had been called out to assist with search and rescue efforts. As a result of his classes, the Montgomery County Emergency

> "It's not hard if you've learned to fly something else. It's similar to playing a complicated video game."

Services began pursuing grants to purchase drones for this and other uses in the department.

As a child, Lee liked playing with remote-control cars, helicopters, and planes. The older he got, the more sophisticated his toys became. Lee got his first drone when he was 22 years old.

"I saw the industry leading somewhere and I thought it would be a good idea to learn how to operate them," Lee said. Fifteen years and dozens of drones later, Lee is one of the top local experts in this field and teaches others how to fly drones at MCC.

"It's not hard if you've learned to fly something else. It's similar to playing a complicated video game," Lee said. Persons who want to learn how to fly drones can now purchase a flight simulator to teach themselves how to fly. Or, they can take Lee's class at Montgomery Community College this fall.

The N.C. Public Safety Drone Academy is designed for emergency service members or first responders, but anyone can take this basic flight class. The Academy will focus on laws and regulations for operating unmanned aerial vehicles while offering an extensive hands-on flight school.

"IN THIS CLASS, STUDENTS WILL LOG FLIGHT HOURS TOWARD AN FAA PILOT CERTIFICATION - PART 107. We've partnered with a company to provide drone flight simulation software and we have two fleets of drones for students to practice on," Lee said. It will be a hands-on course.

THE ACADEMY WILL FEATURE EXTENSIVE SIMULATED FLIGHT TIME, where pilots can grasp drone mechanics and basic operation. The simulator builds skills to prepare them for real flight. After practicing on the simulator, pilots will be given their own drones to fly outdoors to experience various flight conditions.

Finally, pilots will be given live scenario-based flight objectives focusing on fire, rescue, police, and emergency management situations.

"In addition to Lee, there will be other knowledgeable guest instructors assisting with the Academy," said Riley Beaman, Director of Health and Public Safety programs for the Continuing Education department.

For more information about the N.C. Public Safety Drone Academy, contact Riley at 910-898-9683.

Fees for the Academy are waived for all qualified emergency service personnel and first responders.

RE-BOOT YOUR SKILLS

McRae Industries in Mount Gilead, manufacturers of McRae Footwear products, recently signed a memorandum of understanding with Montgomery Community College to provide an 18-month customized training project for McRae Industries employees.

The state-supported project is valued at just over $10,000 and is provided at no cost to the company. MCC makes this opportunity available through the NCWorks Customized Training Program to qualified businesses.

If a business is —making an appreciable capital investment, —deploying new technology that requires training, —enhancing workers' skills, —creating jobs or expanding an existing workforce, or —is enhancing the productivity and profitability of operations in North Carolina, they may qualify for a state-supported NCWorks Customized Training project.

For example, McRae Industries is expecting a significant amount of growth over the next four years requiring 14 new sewing machine operators and six new technicians. Over the past year, the company has invested approximately $5 million in their manufacturing facility and in new business management software systems qualifying them for the project.

MCC will be providing leadership training for supervisors, technician training for sewing machine repair persons, and OSHA 10 safety training, and ISO 9001:2015 training for all staff. The college contracts specialized industry instructors for the training. All training will take place on site at McRae.

The training will support McRae's growth and significant economic value to Montgomery County. Montgomery Community College's NCWorks Customized Training Programs recognize the importance of a well-trained workforce. The college assists new and existing business and industry by reacting quickly to a company's needs while respecting the confidential nature of proprietary processes and information. The college provides support of full-time production and direct customer service positions, preparing the workforce with essential employment skills and enhancing the company's growth potential.

LUPE MERCADO, NURSING ASSISTANT I

Lupe Mercado (front row left) with her Nursing Assistant I class.

Lupe Mercado dropped out of high school when she turned 16.

"It was the second week of 10th grade," Lupe said. "I thought I was grown. I was done with school."

Lupe was doing alright until she had a son—someone who depended on her and who would look up to her as an example. Lupe decided to go back to school so she could make a better life for herself and her son.

"I tried to go back to school. I did online classes, but it was hard to do with a newborn," Lupe said.

Finally, when her son was two years old, Lupe started going to Montgomery Community College for her adult high school equivalency diploma. She was able to take classes at her own pace and around her own schedule, which made it a good fit for her.

Around the same time her sister-in-law told her about the Nursing Assistant program at MCC. Lupe said she had always felt like she would enjoy nursing. Encouraged after taking the first step toward her high school equivalency, Lupe enrolled in the Nursing Assistant program at the same time.

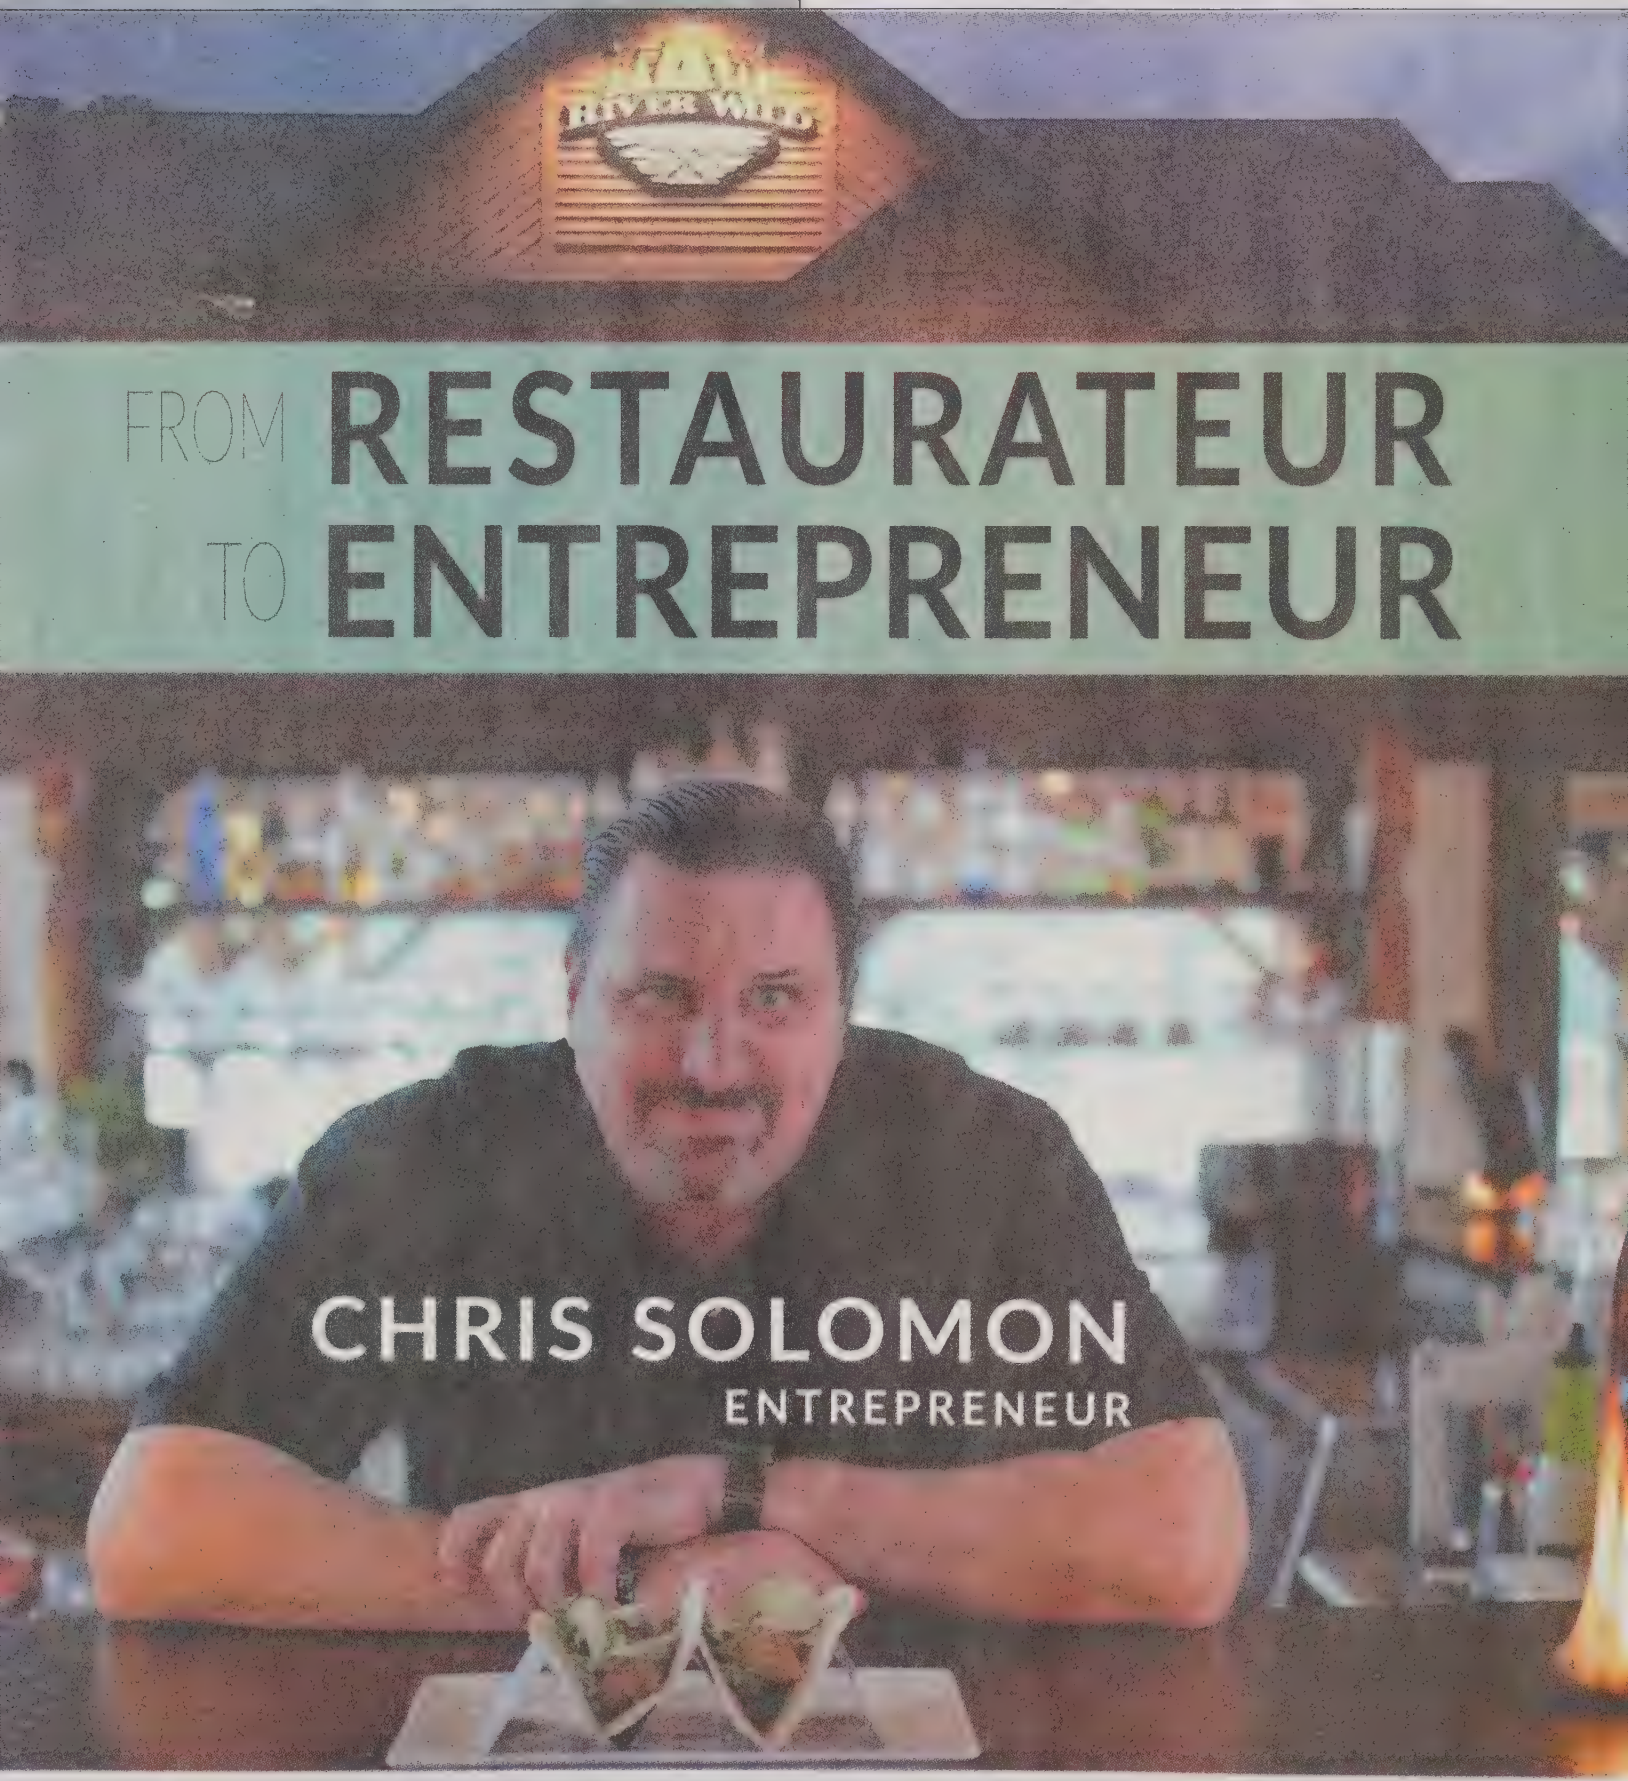
"I enrolled in adult high school on January 6 and then on January 10, I enrolled in Nursing Assistant," Lupe said. "After my first month of adult high school, I wanted to stop. It was very difficult to take nursing and high school classes at the same time."

Her instructor encouraged her to keep going, and in the end, Lupe persevered.

"I loved my high school instructor. If it wasn't for her, I don't think I would have been able to do it. She would call me and encourage me. She helped me make it through," Lupe said.

Lupe crossed the stage at MCC's graduation ceremony in May and was awarded her Adult High School Equivalency Diploma and her registered Nursing Assistant I credential.

Lupe is now working for an assisted living facility and doing well. Her next goal is to go back to school and get her associate degree. When her son grows up and goes to school, Lupe says she can encourage him to finish—because that's what she did.



FROM RESTAURATEUR TO ENTREPRENEUR

About 15 years ago, Chris Solomon's father-in-law approached him about a vision he had for a marina and restaurant on Lake Tillery. Chris was managing a restaurant in Valdosta, Georgia at the time.

"Timing was everything, and I wasn't ready," Chris said. It was a long way to Montgomery County from Valdosta, and an even longer way from restaurant management to entrepreneurship.

Fast forward 14 years later. Chris evolved, and with the additional years of experience, he eventually wanted his own restaurant.

"I told my father-in-law I was ready to be an entrepreneur," Chris said. There was a lot of preparation before he could present the business to his backers, so Chris went to the Small Business Center at Montgomery Community College for help.

"They got me access to software so I could create a business plan, and I bounced ideas off them," Chris said. "They helped me with my marketing projections and we put together our numbers. I took a lot of courses that helped get us to the point where we were able to submit a viable business plan to our backers. The Small Business Center was a necessary step in making the project feasible," he said.

During the process, Chris knew the restaurant would not be ready by its projected opening date of summer 2015. That's when River Wild on Wheels was born. Chris said the food truck slowed progress on the restaurant, but it provided a proving ground for his menu.

"It became our mobile test kitchen," Chris said. The truck also helped them develop an identity, solidified their brand around Montgomery County, and gave them a platform to create food and discover their niche.

"In retrospect, if we hadn't had the food truck, I don't think we would have been as successful with the restaurant," Chris said.

Finally, in February of this year River Wild on Lake Tillery opened for business, and it has been wide open ever since.

"The reaction from the community has been overwhelmingly positive," Chris said. "We doubled our initial expectations. The volume of business has created challenges, but we're working on it."

Chris said the Small Business Center at MCC was a great resource for helping him get started. "They point you in the direction you need to go. They can tell you who to talk to, provide business planning software, tax software, marketing software, and classes – all for free," he said.

Build an Axe with *FORGED IN FIRE* Champ, Liam Hoffman

If you ever got your hands on a blade made by Liam Hoffman, you'd think it was made by a master bladesmith at least twice his age. At 19, Liam won a *Forged in Fire* competition over a master bladesmith who was, you guessed it, twice his age.

Liam is from Crossnore North Carolina; that's in Avery County. When he was 13 he was "just kind-of bored one weekend" and started blacksmithing. "I started with a campfire and a piece of steel that was lying around," he said. He used a hitch on one of his dad's trailers for an anvil, and a claw hammer to make his first knife.

"I pretty much didn't know what I was doing. It wasn't a very good knife," Liam said. Apparently, he had a natural talent for it because by age 16 he was selling his hand made knives. "It happened pretty naturally. I didn't have any expenses so I didn't need to make money. If I did make money, that was O.K. too," he said.

Word spread about the kid on the mountain who could make knives, and by the time he got out of high school, he was making enough to earn a living. "I had a shop and clientele built up when I got out of high school," Liam said.

Liam learned by trial and error. He watched every You Tube video and read everything he could about making blades. However, there's only so much you can learn that way, and Liam's natural abilities and his passion for bladesmithing gave him the 'edge' he needed to progress beyond his years of experience..

When a member of the casting company for the History Channel's *Forged in Fire* show contacted one of Liam's dealers, they were looking for another bladesmith. "My dealer told them they needed to look at me instead," Liam explained.

Liam traveled to Brooklyn, N.Y. for the filming of the competition where he made it into the final elimination. He was given five days to complete a Kora, an 18th century Nepalese fighting sword at his home forge in N.C. Liam had never made a blade that long before. Nevertheless he beat his competition, an ABS Master Bladesmith, to become the youngest *Forged in Fire* champion to date.

Although he has proved he can make anything from a kitchen knife to a sword, Liam's specialty is axes. He currently produces about 1,000 axes a year, and about 70 knives. He sells his wares to outdoorsmen and collectors alike.

Liam's class at Montgomery Community College this fall will be all about hatchets. He will teach students how to forge the tool from start to finish and at the end of the class, students will come away with their own, hand-made hatchet.

To see some of Liam's work, visit his website at www.hoffmanblacksmithing.com. For information about Liam's class, or other knifemaking classes at MCC this fall, visit our website at www.montgomery.edu/futurestudents/continuing-education.

KNIFE MAKING

Ready to enter the 'cutting edge' world of knife making?

Would you like to learn how to make your own custom knife and cutting tools? Or, maybe you are looking to hone your skills in knife making. We offer a variety of weekend, 5-day and semester long classes in our smithy!

Come learn from some of the best knife smiths in the Carolinas and beyond. From folding pocket knives to forged ... we have a class for every interest, from beginner to advanced students are welcome.

MEET OUR INSTRUCTORS,

Ed and Tanya VanHoy

- Award-winning knife designers, makers and engravers for 40+ years
- Owners of Stamascus Knife Works in Abingdon, VA
- Popular knife making instructors at MCC

10/10-12/5 | T | 9:30 AM-4 PM | $127

@ PLASTER USES IN THE STUDIO WITH JOSH MANNING
8/26-27 | SAT&SUN | 9 AM-4 PM | $100

MCC continues its strong commitment to Heritage Crafts through its historic pottery program. The well-equipped 3000 sq. ft. studio offers students the chance to explore Raku, pit firing, and reduction, salt and cone 6 electric firing. Our experienced instructors, Meredith Heywood, Anne Jorgensen and Josh Floyd, share their skills and techniques in open studio courses.

Beginner classes start with specific projects to help build talents and knowledge while advanced classes are designed to push the students' creativity and expand their knowledge. From throwing pots on the wheel, to handbuilding large sculptures, we do it all.

Classes run 9-5, Monday through Friday, with new night and eight-week mini-mester classes. We also offer one- to three-day workshops on subjects such as kiln building or slip trailed decorating. Our working artist series, with visiting artists such as David MacDonald and Ron Phillbeck, are also part of our programming.

Be a part of our creative community! For more information, contact our Heritage Crafts Coordinator and Pottery instructor Josh Floyd at floydj@montgomery.edu, or 910-898-9675.

MCC Forestry Grad Grabs Top Spot on N.Y. State Ranger Exam

Out of 504 candidates taking the New York State Forest Ranger Exam in November 2016, 210 passed, and **MCC Forestry student Michael Raichel made the highest score.**

Raichel is a transplant from Alden, N.Y. who graduated in May. During his summer 2016 co-op in Allegany, N.Y., he had an opportunity he couldn't pass up. The New York State Forest Ranger/Environmental Conservation Officer Exam was being offered for the first time in the years since a hiring freeze was enacted by the state. **Although he was still a student with two semesters left in his program, he decided to take a chance and apply for the exam.**

Forest Rangers are sworn law enforcement officers in the state of New York. Candidates for the job must pass a background check and psychological screening, a physical exam and a fitness test. More importantly, they must have an associate's degree or higher in forestry, or a bachelor's degree with 30 hours in environmental science. Exam takers don't have to have all their credentials at the time of the exam. Needless to say, the education goes a long way toward passing it.

Once candidates pass the exam and screening, the top 50 are chosen to enter a 27-week training academy similar to North Carolina's basic law enforcement training.

Raichel traveled back to Buffalo, N.Y. in November to take the exam. On March 31, 2017 he received his results along with an Order of Merit list indicating candidates in the order in which they scored.

Mike Raichel's name was at the top of the list.

"At first I just thought it was a list showing that I passed. After I read the letter, I found out it showed the ranking of the candidates based on their scores and other criteria," Raichel said. Raichel received preference points for his veteran status in addition to making a perfect 100 points on the exam. Raichel was surprised.

"Before getting into the Forestry program I had no background

or technical knowledge. **I finished on top because of MCC's Forestry program,"** Raichel said. "There were a lot of technical questions: best management practices for water quality, compass conversions, things I learned in the program. **Everyone who took that test had to have a forestry background, but MCC's candidate came out on top,"** he said.

Raichel's achievement is a great testament to his hard work. In addition, it says a lot about the quality of MCC's Forestry program. Raichel's instructors were justifiably proud.

"This is one of the greatest success stories I have seen come from the Forestry program in 21 years of teaching," said Mike Thompson, Lead Forestry Instructor.

Raichel is now back in New York preparing to enter the Forest Ranger Academy.

NEW STUDENT INFORMATION

If you have never attended Montgomery Community College, you may follow these steps to help you get started on a degree, diploma or certificate:

1. Submit a completed admission application. Visit www.montgomery.edu, click on "Students," then "Admissions & Registration" to apply.
2. Request official high school/high school equivalency and college transcripts.
3. Take the placement test. Visit www.montgomery.edu and click on "Students" then "Testing" for a schedule of placement testing sessions.
4. Apply for financial aid. Visit www.montgomery.edu and click on "Students" then "Financial Aid" for a step-by-step application.

REGISTRATION

ADVISING & REGISTRATION FOR NEW STUDENTS: JULY 10 - 21
PLEASE CALL 910-898-9600
Late registration: August 16, 9:00 AM - 12:00 PM & 4:00 PM - 7:00 PM
Submit your application now for fall term!

ACADEMIC CALENDAR

Fall Semester 2017

July 10 - 21	Open registration for new students
August 10, 5:30-8:30 PM	MCC/MCS Open House and Back to School Carnival
August 16	Late registration
August 21	Classes begin
August 30	Last day for partial tuition refund
September 4	Labor Day holiday
September 7	Montgomery Community College 50th Anniversary
September 23	50th Anniversary Gala & Raffle
October 16-17	Fall break
October 18	Mid-term
October 19	2nd 8-week session begins
October 23 - November 3	Advising for spring semester (current students)
November 1	Financial Aid priority deadline for spring semester
November 6 - 17	Spring registration by appointment (new students)
November 15	Last day to drop a course with a "W"
November 22 - 26	Thanksgiving holiday break
December 18	Term ends

Montgomery Community College & Montgomery County Schools

Come One, Come All!

50TH ANNIVERSARY OPEN HOUSE & BACK TO SCHOOL CARNIVAL

Thursday evening, August 10, 2017
5:30 p.m. - 8:30 p.m.

Free food, music, and fun for the whole family!

Come celebrate MCC's 50th anniversary of serving Montgomery County citizens! See the new Montgomery Early College High School. See where the new Central High School will be built. Play carnival games while you find out about all the great things happening this fall at MCC and MCS!
